

Leksell GammaPlan®

- Saves time
- Adds efficiency to workflow
- Treats complex targets
- Achieves higher conformity

WarpSpeed™

Speed up and simplify
your planning

Speed up and optimize your planning

"WARPSpeed is for GammaPlan what Perfexion is for Gamma Knife, it sets a new standard for achieving optimal conformity and efficiency in dose planning"

IAN PADDICK, MEDICAL PHYSICIST.

WarpSpeed™ is one of a series of value adding extensions – add-ons – for Leksell GammaPlan®.

WarpSpeed provides interactive dose planning for unparalleled dose control with unmatched speed through instant updates on screen. This saves time for the user and provides significant benefits:

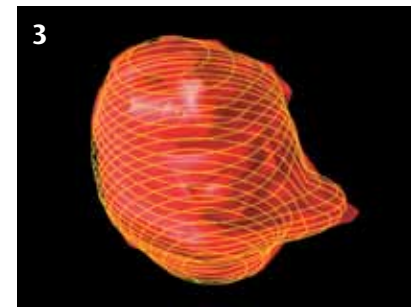

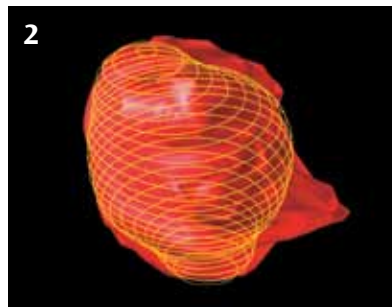

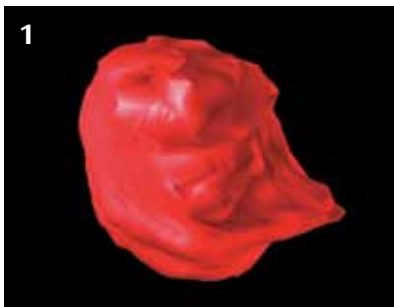

- The workflow is very efficient. The dose distribution is optimized by modifying, adding and removing on-the-fly isocenters in any image with instant feedback.

- WarpSpeed facilitates higher dose conformity thereby sparing adjacent critical organs from unnecessary exposure.
- Treating complex targets is much easier. Thanks to WarpSpeed the user will have more time to elaborate an optimal dose distribution.
- WarpSpeed helps to reduce total time spent in clinic.

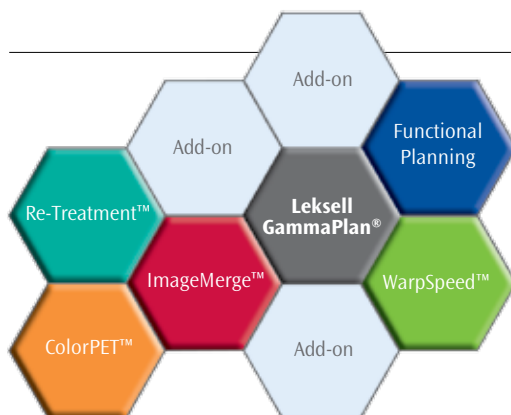

In short – WarpSpeed is not only faster it also results in more effective treatments and better clinical outcome.

Please contact your local Elekta representative for a hands-on demonstration of this unique tool.

For further information go to www.elekta.com/warp.

Snapshots showing updates of the dose distribution when additional isocenters are added.

More power to your planning

Leksell GammaPlan functionality is continuously expanding. The latest software releases for Gamma Knife surgery are using state-of-the-art tools based on Linux and PC. This opens up for future upgrades and opportunities with each add-on meeting specific needs while giving improved workflow, cost-efficiency and treatment quality.
