

## MOSAIQ™ Medical Billing

### Medical Billing and Accounts Receivable Management System

MOSAIQ Medical Billing is a comprehensive solution handling the challenges of A/R management. Easily access clinical and administrative information and seamlessly resolve code compliance and payment issues before claims are generated, resulting in increased reimbursement and reduced A/R days. MOSAIQ Medical Billing enables the effortless electronic processing of all claims, the receipt of multiple payment types including ERA, and simplified claim follow up with automated task execution. The clinical, administrative and billing functions reside in a single database providing the most powerful and coherent view of practice performance.

#### Complete Financial Management

With IMPAC, all of the information gathered during the patient's intake and treatment is available immediately in the billing system. This means that you have immediate access to demographic and patient procedure information, as well as insurance data such as authorization and effective dates to help streamline your billing process. With MOSAIQ Medical Billing you now have more effective management of managed care because referrals and authorizations are integrated across patient demographics, scheduling, and billing. Having access to the complete patient record saves time, ensures data accuracy, minimizes missed charges, improves reimbursement rates and cash flow, and eliminates the need for multiple systems and interfaces.

#### Efficient Code Review & Claim Filing

One of the keys to successful reimbursements is accurate and expedited code and claim processing. MOSAIQ provides automated code capture which is cognizant of the practice processes unique to oncology. Integrated CodeCheck™, provided by Accuro, identifies potential compliance and reimbursement issues for a single code or a batch of codes any time before claims are generated. Intuitive icons and work flow indicate the ICC status of codes and provide easy resolution of issues. MOSAIQ Medical Billing supports automated charge posting, claim generation, and electronic claim submission in the HIPAA compliant format for all payer priority claims, using your choice of clearinghouse or direct to payers.

#### Streamlined Payment Posting

MOSAIQ Medical Billing is designed to make the payment posting process quick, easy, and accurate. eREMIT™ manages ERA payments from both government and commercial payers. The fee schedule automates payment posting and identifies payment discrepancies. The electronic payments are automatically apportioned saving your staff time, improving accuracy, and reducing the time it takes to receive full payment from all payers. Besides providing users full visibility and control of transaction posting and charge balance management, the payment posting process integrates with the patient and insurance follow up process.

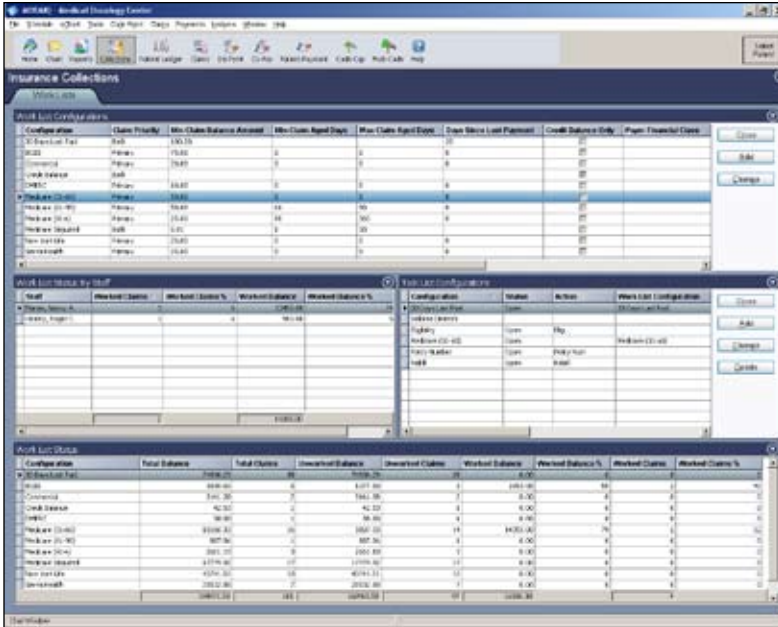

#### Benefits to the front & back office staff

- Improve staff efficiency & lower costs
- Immediate access to administrative and clinical information
- Ensure data accuracy
- Improve reimbursement
- Reduce A/R days
- Seamless workflow from charge capture to payment posting & A/R follow up utilizing automated processes

## Simplified Receivable Management

MOSAIQ Medical Billing provides powerful collections tools that simplify the follow up process and improve staff efficiency. Comprehensive payer profiles are maintained for managing insurance claims and accounts receivable, and an unlimited number of fee schedules are supported to facilitate payment processing and to provide more accurate A/R reporting. On line customizable work lists focus and prioritize follow up activities, enable easy documentation of follow up activities, track follow up status of actions, and allow scheduling of follow up tasks. Billing staff is provided with all of the information required for effective A/R management.

## Flexible Reporting Features

Evaluating practice performance is effortless with Crystal reports and ANALYTIQ™. MOSAIQ Medical Billing provides a variety of standard billing Crystal reports. With ANALYTIQ, IMPAC's data mining and data analysis tool, you can dynamically monitor practice efficiency, productivity, financial performance and clinical quality through an intuitive, graphical user frame work.

## Flexible Deployment

MOSAIQ Medical Billing can handle complete billing and A/R processes for multiple facilities and for a wide range of organizations, from private practices to free standing centers to hospital departments.

## Closing the Loop

MOSAIQ Medical Billing effectively closes the loop between the clinical and financial aspects of providing patient care, from diagnosis and treatment to billing account resolution.

## Product Features

- Practice Management and EMR Integration
- Integrated CodeCheck™
- Electronic claim & ERA processing for government & commercial payers
- Powerful collections tools
- Flexible reporting features
- Extensive user security to support HIPAA compliance
- HIPAA/ANSI electronic claim and payment format
