

DeathMatch™ for METRIQ® Premier

Reduce lost-to-follow-up rate and improve registry productivity

An automated tool, DeathMatch provides assistance in tracking information on patient survival by matching registry patients against a comprehensive and current national mortality listing. As the first automated system to address follow-up productivity, DeathMatch has been enhanced and is now offered as a module for METRIQ Premier.

Current Mortality Data, Automatic Updates

DeathMatch automatically matches registry patients by name, social security number and date of birth against the U.S. national mortality listing.

- Intuitive interface, easy to use
- Every match confirmed by name and birth date
- Automatic update of patient records, logging of changes and report generation
- Identifies cases where the name and/or date of birth do not match the social security number
- Actively prevents cases from falling into the lost-to-follow-up category
- Reduces the number of letters/emails to be written, faxes to be sent or phone calls to be made

Fac	SSN	LName, FName	Birth Date	Death Date	State	Zip
A (Add)	999-99-9497	SMITH, JOHN	11/30/1976	03/10/2009		29306
001	999-99-9497	SMITH, JOHN	11/30/1976		SC	29341
A (Add)	999-99-4309	DOE, BEN	02/22/1927	03/10/2008		29376
001	999-99-4309	DOE, BEN	02/22/1927		SC	29376
A (Add)	999-99-7693	ADAMS, JOHN	06/16/1953	02/24/2006		29322
001	999-99-7693	ADAMS, JOHN	06/16/1953		SC	29322

Sample report for matched records

- DeathMatch synchronizes the SSDI data with your registry database
- The SSDI is updated monthly for more timely DeathMatch processing

Benefits:

How can DeathMatch help your cancer registry program?

- Consistently outperforms manual methods to increase registrar productivity
- Decreases lost-to-follow-up lists by as much as 25-30%
- Lowers the cost of performing follow-up activities
- Results in more accurate, current and reliable data
