Elekta - Climate Change 2021

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Our more than 4,000 employees worldwide are committed to ensuring everyone in the world with cancer has access to – and benefits from – more precise, personalized radiotherapy treatments. We are driven by generating value for our customers and ultimately help clinics and hospitals to improve and save the lives of more patients. Our commitment is built on a combination of curiosity, innovation and proximity to our customers. We are proud that we are the leading innovator in precision radiation medicine. Elekta’s corporate culture is based on openness, corporate responsibility and the company's values. Our values act as motivation and inspiration for our employees, managers and for the organization as a whole. Headquartered in Stockholm, Sweden, Elekta is listed on NASDAQ Stockholm Exchange.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

<table>
<thead>
<tr>
<th>Reporting year</th>
<th>Start date</th>
<th>End date</th>
<th>Indicate if you are providing emissions data for past reporting years</th>
<th>Select the number of past reporting years you will be providing emissions data for</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>May 1 2020</td>
<td>April 30 2021</td>
<td>No</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
</tbody>
</table>

C0.3

(C0.3) Select the countries/areas for which you will be supplying data.

- Algeria
- Australia
- Austria
- Belgium
- Brazil
- Canada
- China
- China, Hong Kong Special Administrative Region
- Czechia
- France
- Germany
- Greece
- India
- Italy
- Japan
- Mexico
- Netherlands
- New Zealand
- Poland
- Portugal
- Republic of Korea
- Singapore
- Spain
- Sweden
- Switzerland
- Turkey
- United Kingdom of Great Britain and Northern Ireland
- United States of America

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.

SEK

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your chosen approach for consolidating your GHG inventory.

- Operational control
C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

Yes

C1.1a

(C1.1a) Identify the position(s) (do not include any names) of the individual(s) on the board with responsibility for climate-related issues.

<table>
<thead>
<tr>
<th>Position of individual(s)</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chief Executive Officer (CEO)</td>
<td>The President &amp; CEO has overall responsibility for the company’s business and is directly communicating with the Senior Vice President Chief Compliance &amp; Integrity Officer, as well as with the Global Sustainability Manager, over questions including climate-related issues.</td>
</tr>
<tr>
<td>Board-level committee</td>
<td>The Board of Directors oversees Elekta's sustainability agenda on a high-level and our President &amp; CEO reports to the Board on major issues. The Board’s Compensation and Sustainability Committee, overseeing Elekta's environmental and social work on a regular basis. (Sustainability matters pertinent to business ethics and anti-bribery and corruption are overseen by the Audit Committee).</td>
</tr>
</tbody>
</table>

Please select

C1.1b

(C1.1b) Provide further details on the board’s oversight of climate-related issues.

<table>
<thead>
<tr>
<th>Frequency with which climate-related issues are a scheduled agenda item</th>
<th>Governance mechanisms into which climate-related issues are integrated</th>
<th>Scope of board-level oversight</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scheduled - all meetings</td>
<td>Reviewing and guiding strategy Reviewing and guiding major plans of action Reviewing and guiding risk management policies Monitoring implementation and performance of objectives Monitoring and overseeing progress against goals and targets for addressing climate-related issues</td>
<td>Not Applicable</td>
<td>Sustainability is high on the board’s agenda. The Board’s Compensation and Sustainability Committee receives quarterly reports on progress on Elekta’s climate agenda (our targets and KPIs for CO2-reduction and circular economy). The global Elekta sustainability agenda is managed and coordinated by Global Sustainability Manager and the Senior Vice President Chief Compliance and Integrity Officer. Last year we established a dedicated program with environmental targets, KPIs, and a global steering team for Green Processes (the environmental focus area of our sustainability agenda), meeting once a month to align, manage and follow up on activities to reach our targets. The Procurement Excellence Forum comprises the Head of Procurement of each business line as well “sustainability leads” from relevant business lines and function, Head of Facilities, members of the Logistics team and other relevant representatives. The forum is chaired by Elekta’s Global Procurement Director together with the Global Sustainability Manager.</td>
</tr>
</tbody>
</table>

C1.2

(C1.2) Provide the highest management-level position(s) or committee(s) with responsibility for climate-related issues.

<table>
<thead>
<tr>
<th>Name of the position(s) and/or committee(s)</th>
<th>Reporting line</th>
<th>Responsibility</th>
<th>Coverage of responsibility</th>
<th>Frequency of reporting to the board on climate-related issues</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chief Sustainability Officer (CSO)</td>
<td>&lt;Not Applicable&gt;</td>
<td>Both assessing and managing climate-related risks and opportunities</td>
<td>&lt;Not Applicable&gt;</td>
<td>Quarterly</td>
</tr>
<tr>
<td>Please select</td>
<td>&lt;Not Applicable&gt;</td>
<td>&lt;Not Applicable&gt;</td>
<td>&lt;Not Applicable&gt;</td>
<td>&lt;Not Applicable&gt;</td>
</tr>
</tbody>
</table>

C1.2a
(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored (do not include the names of individuals).

Our Global Sustainability Manager reports to SVP Chief Compliance and Integrity Officer (heading the Compliance and Integrity department) is responsible for coordinating our Sustainability Program into each function, business unit and business line of the organisation. In developing Elekta’s agenda for environment and related issues, the Global Sustainability Manager aligns and gets buy-in from top management (CEO and Presidents of business lines and relevant function) and works closely with Heads of Procurement and SCM, as well as representatives from engineering, to manage and implement the targets.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

<table>
<thead>
<tr>
<th>Provide incentives for the management of climate-related issues</th>
<th>Comment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Row 1: No, not currently but we plan to introduce them in the next two years</td>
<td></td>
</tr>
</tbody>
</table>

C2. Risks and opportunities

C2.1

(C2.1) Does your organization have a process for identifying, assessing, and responding to climate-related risks and opportunities?

Yes

C2.1a

(C2.1a) How does your organization define short-, medium- and long-term time horizons?

<table>
<thead>
<tr>
<th>From (years)</th>
<th>To (years)</th>
<th>Comment</th>
</tr>
</thead>
<tbody>

<td>Medium-term</td>
<td>3</td>
<td>5</td>
</tr>
<tr>
<td>Long-term</td>
<td>5</td>
<td></td>
</tr>
</tbody>
</table>

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

Substantive financial or strategic impact are risks or opportunities that substantially affect the possibility to reach targets set in relation to the business strategy or financial reporting. Risk assessment is carried out continuously throughout the year in order to identify such risks that can affect the possibility to reach targets. The Elekta risk work is focused on identifying and managing strategic risks, operational risks, legal and regulatory risks, external risks and market- and financial risks.

C2.2
(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

**Value chain stage(s) covered**
- Direct operations
- Upstream
- Downstream

**Risk management process**
Integrated into multi-disciplinary company-wide risk management process

**Frequency of assessment**
Annually

**Time horizon(s) covered**
- Short-term
- Medium-term
- Long-term

**Description of process**

On global level, Elekta has a governance structure in place (as explained in C1.1a), with a BoD’ committee: the Compensation and Sustainability Committee, overseeing Elekta’s environmental and social work on a regular/quarterly basis. The Global Group Sustainability Manager reports to the Board. The Procurement Excellence Forum, chaired by Global Procurement Director together with the Global Group Sustainability Manager, holds monthly meetings in order to follow-up on progress against our environmental targets (e.g. CO2-reduction targets) and KPIs and discuss and manage potential risks, roadblocks and challenges. This group comprises the Head of Procurement of each business line as well “sustainability leads” from relevant business lines and function, Head of Facilities, members of the Logistics team and other relevant representatives. This reporting structure enables us to identify risks and opportunities in a more timely manner. Elekta works systematically with assessing business risks and opportunities in the Enterprise Risk Management Framework. Risks and opportunities are identified and analysed from strategic, operational, legal and regulatory compliance, environmental, financial, reputation etc. aspects. Environmental and climate-related risks/opportunities are included in this framework. Risks and opportunities are evaluated from an impact (on environment in this case) and probability perspective, as well as from upcoming regulatory requirements, return on investment, market potential and Elekta’s influence over the risk/opportunity. Risks and opportunities are identified on both global and local level. Consolidation is done on global level for major risks and opportunities for the whole company. Risk assessments are carried out in an integrated manner at Elekta. All employees and their managers are owner of all risks related to their business operations and are expected to manage these by maintaining internal controls and executing risk and control procedures. Elekta’s support functions - such as Compliance, Regulatory Affairs & Quality, Global Procurement – form a second control level and carry out various risk management and compliance activities to support and monitor the first levels of control (employees). The global procurement team is closely monitoring our supply chain on the materials we buy, to identify, assess and mitigate any potential environmental or climate related risks in our supply chain – as well as monitoring to identify any climate-related opportunities associated with, e.g., switching to source material that have less environmental footprint associated. Our Sustainable Sourcing Program complements this risk process. On local level, Elekta has implemented ISO14001, or similar management system, at all manufacturing/major sites, and as part of the yearly review when targets are set, an evaluation of risks and opportunities is done. There is a regular Management Review meeting at each site to follow-up on activities but also highlights e.g. changing circumstances, such as legal and other requirements related to environmental aspects. In order to see all opportunities, both managers and employees are involved in the innovation and improvement process. Such activities are organized, captured and driven locally.

### C2.2a

**Which risk types are considered in your organization’s climate-related risk assessments?**

<table>
<thead>
<tr>
<th>Relevance &amp; inclusion</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current regulation</td>
<td>Relevant, always included. Current regulation is always included in the analysis of our risk situation, and we therefore have a process to make sure we comply with all applicable environmental legislation and regulation and continuously follows up on any amendment or additions in the legislation or compliance measures in the markets where we operate. Inadequate monitoring of current legislation including on climate-related issues could lead to non-compliance, which in turn could lead to high fines, loss of certificate, exclusion from market or loss of market share etc.</td>
</tr>
<tr>
<td>Emerging regulation</td>
<td>Relevant, always included. Just as we must consider current regulation when assessing our risk situation, we must also consider emerging regulation, such as the evolving scope of the EU Reach-directive, which will directly affect our operations, or emerging environmental reporting regulations, such as the EU Taxonomy. If we don’t participate in external networks and industry associations we are not prepared for emerging climate-related regulation. Elekta is engaged in trade associations such as COCIR and government public consultations. COCIR members play a driving role in developing the future of healthcare in Europe, to communicate with policymakers on economic, regulatory and technical issues related to health care.</td>
</tr>
<tr>
<td>Technology</td>
<td>Relevant, sometimes included. This is part of Elekta’s risk process. As an example, it is included in the R&amp;D budget to develop more energy efficient products, e.g. the linear accelerator. We continue to develop our product portfolio and technology. This is a business opportunity for Elekta.</td>
</tr>
<tr>
<td>Legal</td>
<td>Relevant, always included. Legal risks are included in our risk situation analysis and risk process. Inadequate monitoring of current legislation including on climate-related issues could lead to non-compliance, which in turn could lead to high fines, loss of certificates, exclusion from market or loss of market share etc.</td>
</tr>
<tr>
<td>Market</td>
<td>Relevant, always included. This is part of Elekta’s risk process, and we see it as a business opportunity for Elekta. For example, our customers are increasingly interested in the energy use of our products and we have designed solutions to improve the energy efficiency.</td>
</tr>
<tr>
<td>Reputation</td>
<td>Relevant, sometimes included. This is part of Elekta’s risk process and analysis situation. If external communication around our climate work and initiatives are insufficient, conception amongst external stakeholder may be affected.</td>
</tr>
<tr>
<td>Acute physical</td>
<td>Not relevant, explanation provided. We do not own any assets such as facilities, nor do we operate in an industry with a lot of infrastructure, that are in any risk zones for climate-issues or affected by it, such as oil and gas companies. We do not overly use electricity, water etc.</td>
</tr>
<tr>
<td>Chronic physical</td>
<td>Not relevant, explanation provided. We do not own any assets such as facilities, nor do we operate in an industry with a lot of infrastructure, that are in any risk zones for climate-issues or affected by it, such as oil and gas companies. We do not overly use electricity, water etc.</td>
</tr>
</tbody>
</table>

### C2.3

**Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?**

Yes
C2.3a

(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.

Upstream

Risk type & Primary climate-related risk driver
Please select

Primary potential financial impact
Please select

Climate risk type mapped to traditional financial services industry risk classification
<Not Applicable>

Company-specific description
Risk that certain materials contained in our products will be subject to regulation when such regulation is amended, for example the changing scope of the EU Reach-directive, or the ever increasing environmental reporting and due diligence in supply-requirements. It is probable that such regulation changes will increase the reporting and administrative burden. For Elekta per se but also for the suppliers we use for the material affected by amended regulation, and as a result it would affect (increase) the prices on (our costs for) such material.

Identifier
Opp1

Where in the value chain does the opportunity occur?
Direct operations

Opportunity type
Resource efficiency

Primary climate-related opportunity driver
Use of recycling

Primary potential financial impact
Reduced direct costs

Company-specific description
We see great opportunity for introducing circular a take-back and refurbishment program with circular solutions for assemblies in all our business areas (linear accelerators, gamma knives and brachytherapy product line). Developing business models based on a more circular approach will enable a decoupling of economic value creation from the consumption of finite resources, a prerequisite for a truly sustainable economy. The aim is to increase the lifespan of products and materials by refurbishing products, re-using components, reselling parts at their end-of-life, and recycle materials to minimize wasted resources. We have already implemented circular-economy projects (take back, refurbish and re-use) with regard to our Gamma-knives (two types of assemblies with high environmental impact) and have during the past year scaled this practice up to also cover assemblies and components in our biggest product line, the Linear accelerators. We also see a great opportunity to reuse packaging material for our machines.

<Not Applicable>

Potential financial impact figure – maximum (currency)
<Not Applicable>

Explanation of financial impact figure

Cost to realize opportunity

Strategy to realize opportunity and explanation of cost calculation
There are a number of ongoing and planned projects for taking back parts and components of our machines at end-of-life, refurbishing and subsequently re-using them.
One example is the take-back of major climate-intense components such as the tungsten collimator in the Leksell Gamma Knife® for refurbishment and re-use. During the past year we have scaled this practice up and implemented the approach across our product lines, especially our Linac line which represents the largest part of the business. We now include many different components from our linear accelerators in this program and we continue to identify new components fit for refurbishment. This circular approach hasn’t come without logistical challenges, but it is slowly and steadily proving itself viable, and builds on good practice.

Reduced direct costs

**Company-specific description**
Alongside our aim of increasing product refurbishment, we are also dedicated to decreasing landfill and set a target FY 2019/20 to send zero waste to landfill by 2024/25. We made good progress during the past year, as our largest manufacturing site in the UK moved to zero waste to landfill, and waste to landfill is already zero in our other two major office sites in Europe (Sweden and the Netherlands). Another relevant targets we set for ourselves during FY2019/20, was to reduce the carbon emissions intensity (kg CO₂e/kWh) from our own operations and need of e.g. energy electricity and heating (Scope 2) – by more than 30% by 2021/22, compared with 2018/19. A in less than 12 months we are already on a good track to achieve that target since our sites in the UK, Sweden and the Netherlands are now all running on 100 percent renewable energy, with the Netherlands’ power being produced by a windmill only 4.8 km away from the site. In 2020/21, the emissions intensity (kg CO₂e/kWh) from energy and power supply at our major sites decreased by 12% compared with 2018/2019.

Explanation of financial impact figure

Cost to realize opportunity

Strategy to realize opportunity and explanation of cost calculation
We are currently working on implementing this reduction ambition and our Procurement- and Logistics department is looking into means in how to reduce transportation of components in our products. One mean, is choosing to work with business partners for the management of transport of finished goods and spare parts, enables a more efficient coordination of transport of our own products as well as those from other companies. This also ensures that storage sites worldwide are optimized for minimal handling of products and shortest transport distances. As an example, we already moved the die-casting of heavy iron parts in our Gamma-knives (assembled in Sweden) from China to Sweden, which resulted in significant decreases in emissions. 9. We are working with our transport providers to enable low-emission modalities of transportation, and whenever we can we are switching towards road or sea freight over air transport, civilities paid off and only last year we achieved the target, as our carbon emissions intensity (tons CO2e/MSEK net sales) from transport and logistics was reduced by 25% compared with 2018. Regarding our target to reduce business travel, we are currently working on implementing this reduction ambition more long term and only during the last year our emissions from travel fell 66 % compared to baseline year. The pandemic year proved to us that we can successfully coordinate major projects and conferences across borders and continents, without having to physically travel – saving both time for our employees and the environment. Elekta’s travel policy was further updated in 2020/21 and we urge employees not to travel for business unless necessary. Travel by train or road is preferred over air travel whenever possible

Comment
By supplying goods from near production sites we can not only decrease our emissions by shortening routes, but also costs and delivery times of transportation. Choosing to work with business partners for the management of transport of finished goods and spare parts, enables a more efficient coordination of transport of our own products as well as those from other companies. As most global companies we are already reducing the number of business trips substantially by choosing digital conference solutions, saving both time and the Environment. By introducing a global Flight Policy we further decrease both emissions and costs for business travels for our customers and for our employees.

Explanation of financial impact figure

Cost to realize opportunity

Strategy to realize opportunity and explanation of cost calculation
Elekta’s R&D department drives the application of environmentally conscious design principles during the product development lifecycle, actively addressing opportunities for low energy usage and implementation in areas such as material selection, modular design and circular economy. We are budgeting for R&D in energy-efficiency, and there are already several engineering projects ongoing with the aim of reducing the CO2 emissions from the use of our products.
C3. Business Strategy

C3.1

(C3.1) Have climate-related risks and opportunities influenced your organization’s strategy and/or financial planning?
Yes, and we have developed a low-carbon transition plan.

C3.1a

(C3.1a) Is your organization’s low-carbon transition plan a scheduled resolution item at Annual General Meetings (AGMs)?

<table>
<thead>
<tr>
<th>Is your low-carbon transition plan a scheduled resolution item at AGMs?</th>
<th>Comment</th>
</tr>

Please explain (including target coverage)  
One target area we early set out as relevant, was to reduce our power emissions by a minimum of 30 percent across all major sites (UK, Sweden, China and Netherlands) by 2021/22 (kg CO2e/kWh) compared with 2018/19. We are currently working on implementing this reduction ambition. In less than 12 months we are already on a good track to achieve that target since our sites in the UK, Sweden and the Netherlands are now all running on 100 percent renewable energy, with the Netherlands’ power being produced by a windmill only 4.8 km away from the site. We are now committed to extend our targets and make them more ambitious, in line with the goals of the Paris agreement to limit global warming well below 2 degrees by 2030 - we have signed the commitment letter to the Science Based Targets initiative and will develop Science Based Targets during 2020/21.

Target reference number
We have set a group-wide target to reduce indirect GHG emissions intensity (CO2e/Net Sales) from transport and logistics by 25% by 2025/26, compared to 2018/19. We are working with our transport providers to enable low-emission modalities of transportation, and wherever we can we are switching towards road or sea freight over air transport. By supplying goods from near production sites we can not only decrease our emissions by shortening routes, but also costs and delivery times of transportation. Choosing to work with business partners for the management of transport of finished goods and spare parts, enables a more efficient coordination of transport of our own products as well as those from other companies. During the year, we managed to reduce carbon emissions intensity (tons CO2e/MSEK net sales) from transport and logistics by 25% compared with 2018/19. We are now committed to extend our targets and make them more ambitious, in line with the goals of the Paris agreement to limit global warming well below 2 degrees by 2030 - we have signed the commitment letter to the Science Based Targets initiative and will develop Science Based Targets during 2020/21.

**Target ambition**
<Not Applicable>

Please explain (including target coverage)
Last year, before the pandemic year, we set a target to reduce our global travel emissions (t CO2e/MSEK net sales) with 10% compared with 2018/19. During the pandemic year, we saw them decrease by 86%. The pandemic year, where our travel emissions went down 86 percent, has proven to us that we can successfully coordinate major projects and conferences across borders and continents, without having to physically travel – saving both time for our employees and the environment. Elekta’s travel policy was updated in 2020/21 and we continue to urge employees not to travel for business unless necessary. Travel by train or road is preferred over air travel whenever possible. We are now committed to extend our targets and make them more ambitious, in line with the goals of the Paris agreement to limit global warming well below 2 degrees by 2030 - we have signed the commitment letter to the Science Based Targets initiative and will develop Science Based Targets during 2020/21.

Is this target part of an emissions target?
No
Coordinate a circular economy strategy and continue to drive and implement resource consumption initiatives across the business and product lifecycle. Two specific targets concerning potential reduction in emissions were set last financial year: Establish and implement a take-back program for selected parts by FY 2021/22 end. Adopt the take-back program to refurbish and recycle or remanufacture reclaimed parts and component by FY 2025/26. The desired objective is two-fold: reduce carbon emissions (from an established baseline) and decrease reliance on raw material consumption. There are a number of ongoing and planned circular economy projects (take-back, refurbish and reuse). One example is the tungsten collimator in the Leksell Gamma Knife® (climate-intense component). During the past year we have scaled this practice up and implemented the approach across our product lines, especially our Linac line which represents the largest part of the business. We now include 21 different components from our linear accelerators in this program and we continue to identify new components fit for refurbishment. This circular approach hasn't come without logistical challenges, but it is slowly and steadily proving itself viable, and builds on good practice.

**Please explain (including target coverage)**
Ongoing reduction of waste to landfill. Business Lines and responsible for managing and reducing waste entering landfill disposal. We have set an ambitious target of send "zero waste to landfill" by FY 2024/25. Our largest manufacturing site in the UK moved to zero waste to landfill during the year, and waste to landfill is already zero in our other two major office sites in Europe (Sweden and the Netherlands).
Last year, Elekta set a target to reduce selected packaging by 30 percent by 2025/26 compared with the 2019/20 baseline. We are working towards this goal through a number of initiatives, including a project that aims to re-design packaging cases for Linacs and Patient Support Systems. By reducing the size and weight of packaging materials, and in some cases reuse packaging, we will be able to decrease the material use and also cut the carbon emissions of our transports.

C4.3

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products or do they enable a third party to avoid GHG emissions?

Yes

---

(C4.5a)
(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.

**Level of aggregation**
Group of products

**Description of product/Group of products**
Elekta offers high precision healthcare solutions for the treatment of cancer. The Elekta Linac portfolio business specialises in the delivery of external beam radiotherapy cancer treatment solutions. Innovative eco-design methodologies are frequently adopted leading to continuous modelling, testing and implementation of technological solutions to ensure customer (e.g., hospitals, treatment centres, clinics) avoid emissions and lower energy operating costs, thus, enabling customers to meet organisational environmental objectives. Environmental performance is achieved by way of reducing environmental impact during the product life cycle, e.g., intelligent material selection and reduction of unnecessary mass, minimising equipment operation temperature and installing power saving design features to reduce energy budget, adopting system design and modelling techniques such as ray tracing and Monte Carlo. Real-time monitoring of machine performance and resolving technical issues leading to machine down-time remotely (IntelliMax®) is also a key factor.

Are these low-carbon product(s) or do they enable avoided emissions?
Avoided emissions

**Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions**
Other, please specify (Comparison of product to to competitor)

**% revenue from low carbon product(s) in the reporting year**
<Not Applicable>

**% of total portfolio value**
<Not Applicable>

**Asset classes/ product types**
<Not Applicable>

**Comment**
When compared to comparable products available on the market it has been found Elekta linear accelerators consume approximately 30% less energy. Calculations are based on Elekta in-house methodology taking into consideration average workday machine usage, patient treatment patterns, and power status. Whilst the calculation and methodology remain valid, we are in the process of renewing emission calculations to best reflect current product lines and available portfolio.

---

**C5. Emissions methodology**

(C5.1) Provide your base year and base year emissions (Scopes 1 and 2).

**Scope 1**

**Base year start**
May 1 2018

**Base year end**
April 30 2019

**Base year emissions (metric tons CO2e)**
639

**Comment**
The GHG Protocol Corporate Standard suggests that structural changes in an organization should trigger a recalculation of base year emissions. Accordingly, the base year has been corrected since Elekta does have scope 1 emissions (there has been a correction of moving heating from scope 2 to scope 1 due to gained clarity that the heating comes from burning gas within Elekta's premises). Further, the base year for these scope 1 emissions is 2017/18 (as also for scope 2).

**Scope 2 (location-based)**

**Base year start**
May 1 2017

**Base year end**
April 30 2018

**Base year emissions (metric tons CO2e)**
2938

**Comment**
The GHG Protocol Corporate Standard suggests that structural changes in an organization should trigger a recalculation of base year emissions. Accordingly, the base year for scope 2 market-based has been corrected.
C5.2

(C5.2) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.

Comment

C6.4

(C6.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?

Yes

C6.4a
(C6.4a) Provide details of the sources of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure.

**Source**
Elekta excludes scope 1 and 2 emissions from non-major office sites around the world; specifically, this entails locations with less than 200 employees.

**Relevance of Scope 1 emissions from this source**
Emissions are not relevant

**Relevance of location-based Scope 2 emissions from this source**
Emissions are not relevant

**Relevance of market-based Scope 2 emissions from this source (if applicable)**
Emissions are not relevant

**Explain why this source is excluded**
The reported scope 1 and 2 emissions only entail gas (scope 1) and electricity (scope 2) use within Elekta's major sites (locations with >200 employees). Hence, Elekta sites with less than 200 employees are excluded since those emissions do not contribute to 95% of Elekta's overall emissions inventory (once sources are listed by the size of emissions). This evaluation took place on the basis of average scope 1 and 2 emissions per employee (based on the major sites SE, NL, UK, CN, US) which have been multiplied with the number of employees in locations other than those major Elekta sites.

---

C6.5

(C6.5) Account for your organization's gross global Scope 3 emissions, disclosing and explaining any exclusions.

**Purchased goods and services**

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
394935

**Emissions calculation methodology**
Calculations were prepared by applying a “spend-based” methodology in accordance with the GHG Protocol, where accurate data from suppliers and value chain partners is not available. The emissions were calculated through mapping each purchased goods and services category to an environmentally extended input-output analysis (EEIO).

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
0

**Please explain**
For 2020, no direct data was retrievable from goods and services suppliers. However, Elekta strives also within this category for the hybrid method where a combination of supplier-specific activity data where available and secondary data to fill the gaps is used to assess the impact within the category of purchased goods and services.

**Capital goods**

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
1377

**Emissions calculation methodology**
Calculations were prepared by applying a “spend-based” methodology in accordance with the GHG Protocol, where accurate data from suppliers and value chain partners is not available. The emissions were calculated through mapping each capital goods category to an environmentally extended input-output analysis (EEIO).

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
0

**Please explain**
For 2020, no direct data was retrievable from capex suppliers. However, Elekta strives also within this category for the hybrid method where a combination of supplier-specific activity data where available and secondary data to fill the gaps is used to assess the impact within the category of capital goods.

**Fuel-and-energy-related activities (not included in Scope 1 or 2)**

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
688.23

**Emissions calculation methodology**
Based on the used volumes per fuel type and the kWhs for electricity, WTT emissions have been calculated using the 2020 emissions factors published by the Department for Environment, Food and Rural Affairs (DEFRA).

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
0

**Please explain**
Due to the very limited influence on those value chain emissions, Elekta does not focus on engaging with suppliers in this regard but rather lays the focus on reducing e.g. the fuel use in general that would also result in less emissions within this category.
Upstream transportation and distribution

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
33631

**Emissions calculation methodology**
59% of the emission figure is based upon the “spend-based” methodology in accordance with the GHG Protocol, where accurate data from suppliers and value chain partners is not available. The emissions were calculated by mapping each transport services category to an environmentally extended input-output analysis (EEIO). For the remaining 41% of emissions assigned to this category, supplier-specific data was the basis of the calculations (weight of transported good, mode of transport, distance transported and, if available, GHG emissions). Emission data for upstream transportation and distribution not coming from logistics suppliers directly has been calculated by considering the transport mode, weight of transported goods, and distance of transport and applying the 2020 emission factors for frightening of goods published by the Department for Environment, Food and Rural Affairs (DEFRA).

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
41

Please explain

Waste generated in operations

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
5.3

**Emissions calculation methodology**
Calculations were prepared by applying a “spend-based” methodology in accordance with the GHG Protocol, where accurate data from suppliers and value chain partners is not available. The emissions were calculated by mapping each category of waste services to an environmentally extended input-output analysis (EEIO).

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
0

Please explain
Due to Elekta's working from home policy within 2020/21 due to COVID-19, very few employees were within Elekta offices. Due to this fact, the waste figure is significantly low for 2020/21. For next year, when more office usage takes place again, Elekta also strives to again provide emission figures which are based on activity data of its waste suppliers.

Business travel

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
2616

**Emissions calculation methodology**
Elekta Travel Management System (TMS) contains all applicable travel data provided by the appropriate travel agencies used by Elekta for business travel activity (mode of transport, distance traveled, departure and destination location, and GHG emissions). 100% of the total travel emissions are based on supplier activity data that have been provided to Elekta directly. Emission figures provided by the travel suppliers were given as CO2-equivalents.

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
100

Please explain

Employee commuting

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
0

**Emissions calculation methodology**
Due to Elekta's working from home policy within 2020/21 due to COVID-19, factually no employee commute took place. Hence, within 2020/21 no emissions are associated with this category.

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
0

Please explain
Commuting figures can't be supplied by a supplier, but rather through surveys of commuting habits.
Upstream leased assets

**Evaluation status**
Not relevant, explanation provided

**Metric tonnes CO2e**
<Not Applicable>

**Emissions calculation methodology**
<Not Applicable>

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
<Not Applicable>

**Please explain**
Elekta does not lease any upstream assets with relevant emissions that fall within scope 3 due to the set organizational boundary (relevant emissions from leased office/manufacturing buildings are included within scope 1 and 2).

Downstream transportation and distribution

**Evaluation status**
Not relevant, explanation provided

**Metric tonnes CO2e**
<Not Applicable>

**Emissions calculation methodology**
<Not Applicable>

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
<Not Applicable>

**Please explain**
Close to all transportation activities are captured within category 4 (Upstream transportation and distribution) since only less than 5% of Elekta’s total transportation is not purchased by Elekta. Hence, emissions from transport that fall into scope 3 category 9 are irrelevant due to their small magnitude.

Processing of sold products

**Evaluation status**
Not relevant, explanation provided

**Metric tonnes CO2e**
<Not Applicable>

**Emissions calculation methodology**
<Not Applicable>

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
<Not Applicable>

**Please explain**
Not applicable to Elekta’s business type since no further processing of the sold goods takes place.

Use of sold products

**Evaluation status**
Relevant, calculated

**Metric tonnes CO2e**
30177

**Emissions calculation methodology**
Emissions associated with the use of all products sold during the reporting period have been assessed by considering the energy usage per product (Linac, MR-Linac and Gammaknife) over its lifetime together as well as the energy mix of the country to which a product has been sold to.

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
0

**Please explain**
Emission figures in regards to the use of sold products are not provided by suppliers since Elekta calculated them in-house (since the products are also designed and manufactured by Elekta).

End of life treatment of sold products

**Evaluation status**
Relevant, not yet calculated

**Metric tonnes CO2e**
<Not Applicable>

**Emissions calculation methodology**
<Not Applicable>

**Percentage of emissions calculated using data obtained from suppliers or value chain partners**
<Not Applicable>

**Please explain**
Obtaining end-of-life treatment of sold products data would require extensive customer surveying and modeling of end-of-life treatments for all markets Elekta is currently active. The quality and availability of data is a major constraint when assessing the end-of-life treatment of sold products, requiring an understanding of disposal practices and behaviors across our customer base and active markets, globally.

C6.7

(C6.7) Are carbon dioxide emissions from biogenic carbon relevant to your organization?

No

C6.10
(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure
2.2e-7

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)
3038.89

Metric denominator
unit total revenue

Metric denominator: Unit total
13763000000

Scope 2 figure used
Market-based

% change from previous year
25.3

Direction of change
Increased

Reason for change
This year’s figure compared to the corrected last year’s figure (2572 t of gross global combined scope 1 and 2 emissions) leads to an increase since the reported scope 2 emission figure this year is higher since last year’s scope 2 figure didn’t include the location US. Including this, together with also a decrease of the revenue figure, leads to the overall increase of this intensity figure.

Intensity figure
0.680145

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)
3038.89

Metric denominator
Other, please specify (Number of employees)

Metric denominator: Unit total
4468

Scope 2 figure used
Market-based

% change from previous year
9.5

Direction of change
Increased

Reason for change
This year’s figure compared to the corrected last year’s figure (2572 t of gross global combined scope 1 and 2 emissions) leads to an increase since the reported scope 2 emission figure this year is higher since last year’s scope 2 figure didn’t include the location US. Including this, leads to the overall increase of this intensity figure.

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?
No

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/region.

<table>
<thead>
<tr>
<th>Country/Region</th>
<th>Scope 1 emissions (metric tons CO2e)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Europe</td>
<td>533.85</td>
</tr>
<tr>
<td>We do not have any emissions in Scope 1</td>
<td></td>
</tr>
</tbody>
</table>

C7.3

(C7.3) Indicate which gross global Scope 1 emissions breakdowns you are able to provide.
By business division
(C7.3a) Break down your total gross global Scope 1 emissions by business division.

<table>
<thead>
<tr>
<th>Business division</th>
<th>Scope 1 emissions (metric ton CO2e)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Elekta Ltd</td>
<td>381.89</td>
</tr>
<tr>
<td>Elekta/Nucletron Operations B.V.</td>
<td>151.96</td>
</tr>
</tbody>
</table>

(C7.5) Break down your total gross global Scope 2 emissions by country/region.

<table>
<thead>
<tr>
<th>Country/Region</th>
<th>Scope 2, location-based (metric tons CO2e)</th>
<th>Scope 2, market-based (metric tons CO2e)</th>
<th>Purchased and consumed electricity, heat, steam or cooling (MWh)</th>
<th>Purchased and consumed low-carbon electricity, heat, steam or cooling accounted for in Scope 2 market-based approach (MWh)</th>
</tr>
</thead>
<tbody>

</table>

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Market-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

| Consumption of fuel (excluding feedstocks)                   | Yes                  |
| Consumption of purchased or acquired electricity             | Yes                  |
| Consumption of purchased or acquired heat                   | No                   |
| Consumption of purchased or acquired steam                  | No                   |
| Consumption of purchased or acquired cooling                | No                   |
| Generation of electricity, heat, steam, or cooling          | No                   |

(C8.2a) Report your organization’s energy consumption totals (excluding feedstocks) in MWh.

<table>
<thead>
<tr>
<th>Heating value</th>
<th>MWh from renewable sources</th>
<th>MWh from non-renewable sources</th>
<th>Total (renewable and non-renewable) MWh</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>14580</td>
</tr>
</tbody>
</table>
C8.2b

(C8.2b) Select the applications of your organization’s consumption of fuel.

<table>
<thead>
<tr>
<th>Application of Fuel Consumption</th>
<th>Indicate whether your organization undertakes this fuel application</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consumption of fuel for the generation of electricity</td>
<td>No</td>
</tr>
<tr>
<td>Consumption of fuel for the generation of heat</td>
<td>Yes</td>
</tr>
<tr>
<td>Consumption of fuel for the generation of steam</td>
<td>No</td>
</tr>
<tr>
<td>Consumption of fuel for the generation of cooling</td>
<td>No</td>
</tr>
<tr>
<td>Consumption of fuel for co-generation or tri-generation</td>
<td>No</td>
</tr>
</tbody>
</table>

C8.2c

(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.

**Fuels (excluding feedstocks)**

- **Natural Gas**
  - Heating value: Unable to confirm heating value
  - Total fuel MWh consumed by the organization: 2727.54 MWh

- **MWh fuel consumed for self-generation of electricity**: <Not Applicable>
- **MWh fuel consumed for self-generation of heat**: <Not Applicable>
- **MWh fuel consumed for self-generation of steam**: <Not Applicable>
- **MWh fuel consumed for self-generation of cooling**: <Not Applicable>
- **MWh fuel consumed for self-cogeneration or self-trigeneration**: <Not Applicable>

- **Emission factor**: 0.196 kg CO2e per KWh

- **Unit**: kg CO2e per KWh

- **Emissions factor source**: Department for Environment, Food & Rural Affairs (DEFRA) 2020 emission factors.

- **Comment**
(C8.2e) Provide details on the electricity, heat, steam, and/or cooling amounts that were accounted for at a zero emission factor in the market-based Scope 2 figure reported in C6.3.

**Sourcing method**
Green electricity products (e.g. green tariffs) from an energy supplier, supported by energy attribute certificates

**Low-carbon technology type**
- Hydropower
- Biomass
- Wind
- Nuclear

**Country/area of consumption of low-carbon electricity, heat, steam or cooling**
- Sweden
- United Kingdom of Great Britain and Northern Ireland
- Netherlands

**MWh consumed accounted for at a zero emission factor**
- 596
- 4994
- 178.12
- 210.12

**Comment**
- Sweden site purchases certified renewable energy guarantees of origin.
- United Kingdom site purchased certified renewable energy guarantees of origin.
- Other, please specify (To account for the NL share of low-carbon energy prior to the switch to the green tariff, this figure reflects the share of nuclear energy within NL’s 2020 residual mix (AIB 2020 emission factor).)
- Since there has been a switch within Elekta’s dutch office to a fully renewable energy provider, this figure reflects the share of nuclear energy as low-carbon energy type within NL’s 2020 residual mix; based on the emission factors issued by the EU’s Association of Issuing Bodies (AIB) to account for the NL share of low-carbon energy prior to the switch to the green tariff.)

C9. Additional metrics

C9.1
(C9.1) Provide any additional climate-related metrics relevant to your business.

<table>
<thead>
<tr>
<th>Description</th>
<th>Energy usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Metric value</td>
<td>2.65</td>
</tr>
<tr>
<td>Metric numerator</td>
<td>Electricity (MWh)</td>
</tr>
<tr>
<td>Metric denominator (intensity metric only)</td>
<td>Number of employees</td>
</tr>
<tr>
<td>% change from previous year</td>
<td>20.9</td>
</tr>
<tr>
<td>Direction of change</td>
<td>Increased</td>
</tr>
</tbody>
</table>

Please explain
This year, we have incorporated also the energy usage of the US facilities which led to an increase of the total number of MWhs used. Since we however compare this to the total global number of employees, this led to an increase of this metric.

<table>
<thead>
<tr>
<th>Description</th>
<th>Energy usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Metric value</td>
<td>211.4</td>
</tr>
<tr>
<td>Metric numerator</td>
<td>Scope 2 emissions (kg)</td>
</tr>
<tr>
<td>Metric denominator (intensity metric only)</td>
<td>Electricity (MWh)</td>
</tr>
<tr>
<td>% change from previous year</td>
<td>2.3</td>
</tr>
<tr>
<td>Direction of change</td>
<td>Decreased</td>
</tr>
</tbody>
</table>

Please explain
Due to the further active procurement of renewable energy, this metric of emissions per MWh did decline.

C10. Verification

C10.1

(C10.1) Indicate the verification/assurance status that applies to your reported emissions.

<table>
<thead>
<tr>
<th>Scope</th>
<th>Verification/assurance status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scope 1</td>
<td>No third-party verification or assurance</td>
</tr>
<tr>
<td>Scope 2 (location-based or market-based)</td>
<td>No third-party verification or assurance</td>
</tr>
<tr>
<td>Scope 3</td>
<td>No third-party verification or assurance</td>
</tr>
</tbody>
</table>

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?
No, we do not verify any other climate-related information reported in our CDP disclosure

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
No, and we do not anticipate being regulated in the next three years

C11.2
(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?
No

C11.3

(C11.3) Does your organization use an internal price on carbon?
No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?
Yes, our suppliers

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement
Information collection (understanding supplier behavior)

Details of engagement
Collect climate change and carbon information at least annually from suppliers

% of suppliers by number
2.33

% total procurement spend (direct and indirect)
5.48

% of supplier-related Scope 3 emissions as reported in C6.5
45.61

Rationale for the coverage of your engagement
Due to the high level of operational influence, the scope 3 categories business travel and upstream transportation and distribution are chosen. Specifically, this means that travel policies can be implemented quite flexibly, and also logistics can fall back more easily on alternatives (such as different transport modes) compared to e.g. product materials which might not be easily replaceable. Engaging with the suppliers falling into this category and retrieving Elekta-specific emission information from those suppliers directly allows us to make informed decisions on reduction initiatives. Another reason is the maturity of those sectors in terms of being able to provide emission figures based on the by us purchased services.

Impact of engagement, including measures of success
Engaging with our travel and transport suppliers directly leads to continuous improvement of our emission calculations. Hence, when it comes to measuring the success of this supplier engagement we look at the share of activity data we retrieve from suppliers within the respective scope 3 categories. Further, a positive impact of this engagement is that our regular request for activity data improves the suppliers’ data quality (format, clearness, etc.). Further, this engagement and the resulting activity data, allows us to track our targets within those areas.

Comment
The percentage of supplier-related scope 3 emissions as reported in C6.5 does only look at the suppliers that fall into the two considered categories of business travel and upstream transportation and distribution. I.e. 45.61% of the total emissions from the two categories business travel and upstream transportation and distribution are based on supplier activity data.

C12.3

(C12.3) Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?
Trade associations

C12.3b

(C12.3b) Are you on the board of any trade associations or do you provide funding beyond membership?
Yes
Trade association
European Coordination Committee of the Radiological, Electromedical and Healthcare IT Industry (COCIR)

Is your position on climate change consistent with theirs?
Consistent

Please explain the trade association’s position
COCIR continuously supports the concept of medical device refurbishment, remanufacturing and recycle (RRR). The advent of related environmental regulation, such as RoHS and REACH whilst proclaim to harmonise efforts to legally enforce the banning and market control of specific hazardous substances potentially present in parts and components of radiotherapy equipment, do not sufficiently address the RRR approach. This creates difficulty for companies such as Elekta to proceed with such initiatives (e.g., Circular economy, self regulation).

How have you influenced, or are you attempting to influence their position?
Elekta along with COCIR partners are participating in the early stage of engagement to ensure any modified legislation takes into consideration the opinion and position of radiotherapy equipment manufacturers in order to secure a sound balance between compliance obligations and sustainable business innovation. This includes actions to look into supporting efforts to recycle large scale fixed installed equipment, such as radiotherapy machines and circular economy green initiatives in Europe and worldwide.

What processes do you have in place to ensure that all of your direct and indirect activities that influence policy are consistent with your overall climate change strategy?
Elekta engagement with trade associations is the responsibility of Director of Public Affairs, who reviews membership schemes with appropriate subject matter experts in accordance with the vision of Elekta.

Have you published information about your organization’s response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).
