

Hope for
everyone
dealing
with cancer.

Experience the difference

Experience the most comprehensive radiation therapy ecosystem—adaptive, precise and personalized for you, your patients and your practice.

Cancer care is a complex and diverse challenge, so our approach is both adaptable and collaborative. We work with you to solve real-world challenges, deliver improved outcomes, increase efficiency and ensure that every patient has hope for the future.

By partnering with Elekta, you become part of a community focused on transforming patient experience and outcomes—building a more inclusive approach to radiation therapy where everybody has access to the best care possible.

Versatile solutions

Benefit from the freedom, flexibility and openness of our solutions, building approaches that are tailored to the unique needs of your practice and your patients.

Culture of innovation

Put your trust in a pioneer in precision radiation therapy, with decades of innovation and dedication to advancing cancer care.

Committed to partnership

Experience dedicated support at every stage from Elekta experts—transferring knowledge and putting you at the center of our global partner network.

Together, we can bring hope to those dealing with cancer.

Versatile solutions

Work with the only independent provider of comprehensive, dedicated radiation therapy solutions and tailored services, allowing personalization of cancer care across all treatment modalities.

Your practices and your patients are unique, so we have created a comprehensive and sufficiently versatile portfolio to meet your needs, now and tomorrow.

Our commitment to openness gives you the freedom and flexibility to build solutions that are best suited for your clinical and operational needs.

“At Elekta, we believe in providing our customers with openness, flexibility and choice. We have designed our solutions to work across vendors and platforms, while delivering an integrated workflow experience, empowering clinicians to take approaches which are right for them, their patients and their clinics.”

Maurits Wolleswinkel

Chief Product Officer, Elekta

Culture of innovation

Together, we push the boundaries of precision radiation therapy. Backed by an unrivaled track record of innovation, our ground-breaking work has led us to overcome some of the biggest challenges in the history of cancer care.

We continue to innovate, with experts like you, to set standards that redefine treatment in oncology and neurosurgery.

"From our early days, more than 50 years ago, a culture of innovation has driven us forward. From minimally invasive, exceptionally precise Gamma Knife radiosurgery—which transformed how clinicians treat intracranial targets—to the integration of radiation and MRI in the Elekta Unity. We strive to broaden and push the horizons of precision radiation therapy and do so in collaboration with our customer and partner community. This gives you access to cutting-edge thinking while providing opportunities to play a key role in product development."

Larry Leksell

Founder and Chairman of the Board, Elekta

 Elekta

Committed to partnership

Our relationship extends beyond the delivery of a product—it is defined by a commitment to partnership. We work with you at every stage, transferring knowledge and solving problems together.

When you become part of the Elekta ecosystem, you are more than a customer. You sit at the center of a global network comprising hundreds of experts, all sharing knowledge, insights and best practices.

You are connected to a global clinical community, where you can collaborate to push the boundaries of science and medicine. Uniting with the world's leading radiation, medical oncology and surgical experts, we build understanding and optimize the effectiveness of combined treatments.

“The future of oncology and radiation therapy will be defined by collaboration. Elekta strives to bring together the brightest and most experienced minds and enables them to work together as a global community. We truly believe that together we can bring hope to those dealing with cancer.”

By your side

Experience precision radiation therapy for everyone, everywhere

A prolonged, disease-free life is what cancer patients hope for.

As clinics become more collaborative and treatments become more personalized, Elekta is using precision radiation medicine to work towards a future where everyone can benefit from precise and individually tailored radiotherapy treatments, regardless of need or location.

Through integral precision combined with easy-to-learn, simple and efficient workflows, our range of linear accelerators aim to let more patients benefit from high-precision, personalized treatments.

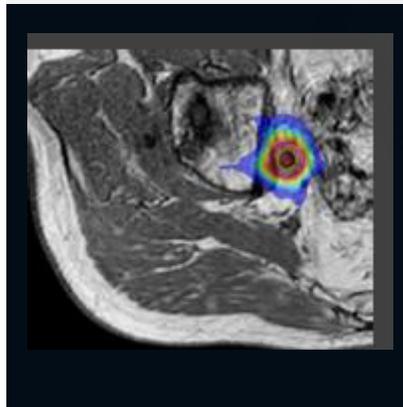

Experience seeing and treating like never before with **MR-guided radiation therapy**

Elekta Unity brings together diagnostic quality MR imaging with a linear accelerator, allowing you to see what you could never see before.

Continuous, rich and timely insights into motion and response enable truly precise, personalized radiotherapy. Elekta Unity gives you unparalleled levels of insight, control and concentrated timelines, enabling opportunities for better outcomes and fewer side effects.

Elekta Unity Comprehensive Motion Management (CMM) functionality has CE mark and is pending FDA 510(k) clearance. CMM may not be available in all markets.

Experience excellent precision through **stereotactic radiosurgery and neurosurgery**

Since our founder, Professor Lars Leksell created Leksell Gamma Knife® and the stereotactic headframe over 50 years ago, we have led in treatments for complex intracranial indications.

Our decades of innovations in radiosurgery and neurosurgery ensure that your treatment team has the right solution at hand to meet the growing needs of efficient, personalized care.

Leksell Gamma Knife is an alternative to traditional brain surgery and whole brain radiation therapy for the treatment of complex and challenging brain conditions. It is a non-invasive stereotactic radiosurgery instrument that involves no scalpel or incision—it's not a knife at all.

Up to 192 precisely focused beams of radiation control malignant and nonmalignant tumors, as well as, vascular and functional disorders in the brain, without harming surrounding healthy tissue. Leading centers around the world choose Leksell Gamma Knife for its accuracy and documented outcomes.

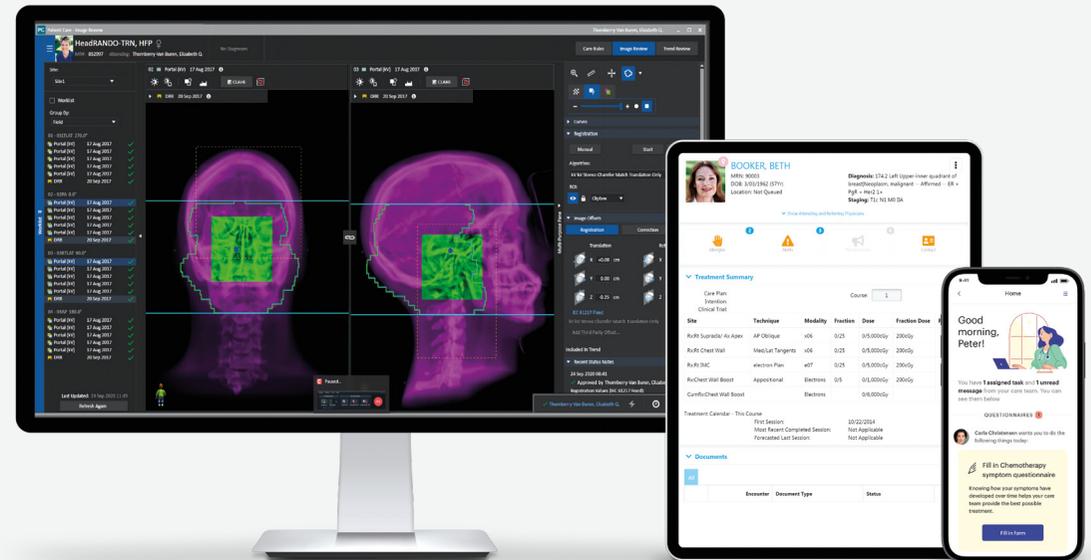

Experience the power of **oncology** informatics

Whatever size your clinic, wherever you are, our suite of digital solutions provide the support you need to deliver the best multidisciplinary care possible for your patients—consistently, reliably, and securely—connecting you to every moment of their journey, from diagnosis to survivorship generating data to measure **Real-World Outcomes**.

Workflows are simplified, helping you achieve true precision oncology care, personalized for your patients. Big data is transformed to work for you, distributing tasks and centralizing knowledge.

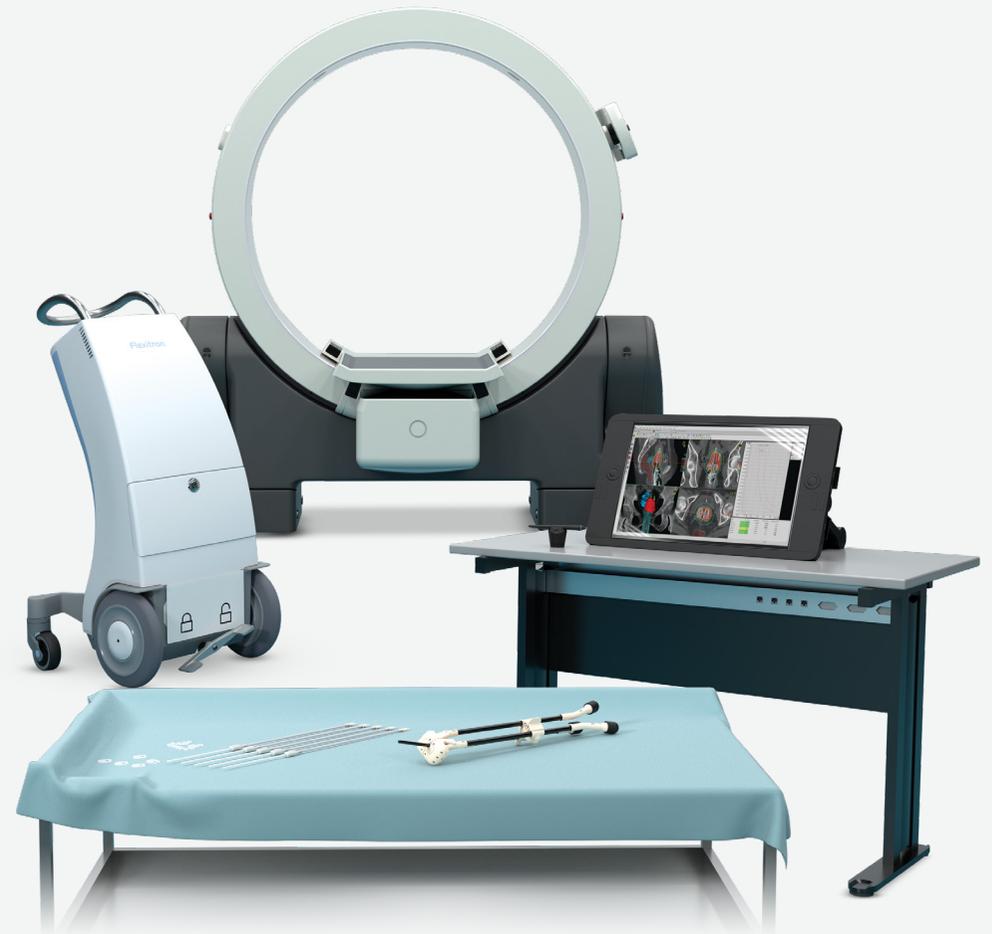

Patient care continues beyond the hospital with digital tools connecting you to your patients.

Experience the full potential of **brachytherapy interventional radiotherapy**

Building on decades of experience, Elekta offers a complete solution for contemporary interventional radiotherapy—bringing the entire brachytherapy workflow into one room.

Discover how our mobile in-room imaging solution minimizes patient movement and gives clinicians the ability to realize a more efficient workflow, accurate implant and dose precision, with the patient at its heart.

Experience **services** that transform your work and results

From installation, throughout the lifetime of your system, our people and services keep you moving.

With Elekta Care, you can be confident that your system will be operational whenever you need it, keeping your practice running smoothly and ensuring patient treatments stay on schedule. This includes our unique education proposition customized around your clinical milestones, our market-leading predictive services solution which identifies and tackles issues before they occur, and access to a community of best-in-class experts to improve efficiency and outcomes for you, your practice and your patients.

Elekta Care

By your side

Experience the difference of partnering with Elekta

- Over 50 years of **ground-breaking technology**
- An independent company, with a dedicated focus on **precision radiation therapy**
- A comprehensive range of **versatile solutions** and services to meet your needs
- A **culture of innovation** and commitment to push boundaries and deliver opportunities for better outcomes, access and personalization for patients
- A unique approach to collaboration with customers, partners and experts to address the challenges that matter—a true **commitment to partnership**

As a leader in precision radiation therapy, Elekta is committed to ensuring every patient has access to the best cancer care possible. We openly collaborate with customers to advance sustainable, outcome-driven and cost-efficient solutions to meet evolving patient needs, improve lives and bring hope to everyone dealing with cancer. To us, it's personal, and our global team of 4,700 employees combines passion, science, and imagination to profoundly change cancer care.

**We don't just build technology,
we build hope.**

Hope for everyone dealing with cancer.
