

Carbon Reduction Plan template

Supplier name

Elekta Limited

Publication date

28 October 2026

Commitment to achieving net zero

Elekta Limited is committed to achieving net zero emissions by 2050.

Baseline emissions footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2021/22

Additional details relating to the baseline emissions calculations:

Emissions below are linked to Elekta Limited (UK) only. Scope 3 emissions include categories 4) upstream transportation and distribution, 5) waste, 6) business travel, 7) employee commuting, and 9) downstream transportation and distribution.

Baseline year emissions:

Emissions	Total (tCO ₂ e)
Scope 1	678
Scope 2 (market based)	0*
Scope 2 (location based – for information)	1165
Scope 3 (included sources)	4,617
Total emissions	5,295

* 100% renewable energy procured through 3rd party agreement.

Current emissions reporting

Reporting year: 2025/26

Emissions	TOTAL (tCO ₂ e)
Scope 1	430
Scope 2 (market based)	0*
Scope 2 (location based – for information)	719
Scope 3 (included sources)	4532
Total emissions	4,962

* 100% renewable energy procured through 3rd party agreement.

Emissions reduction targets

Elekta AB's (ultimate parent company of Elekta Limited) global emissions targets are aligned with the Paris Agreement and validated by the Science Based Targets initiative (SBTi)

- Reduce global Scope 1 and 2 emissions by **46.2% by 2031/32**, against the 2021/22 base year.
- Use **100% renewable electricity by the end of 2030**.
- Reduce emissions from the use and end-of-life treatment of sold products by **55% by 2031/32**.
- Engage selected suppliers, representing **27.5% of supply-chain emissions**, to set science-based targets by **2026/27**.
- Elekta does not use carbon offsets; it focuses on measured operational and value-chain reductions.

Carbon reduction projects

Completed carbon reduction initiatives

The following environmental management measures and projects have been completed or implemented since the 2021/22 baseline. The carbon emission reduction achieved by these schemes equate to 333 tCO₂e, a 6% reduction against the 2021/22 baseline and the measures will be in effect when performing the contract.

- **Buildings and energy:** The UK has already moved to renewable electricity, installed voltage optimisation, and put campus buildings into the BREEAM In Use improvement scheme.
- **Employee transport:** An electric-vehicle salary-sacrifice leasing programme has resulted in more than 100 staff using EVs for commuting.
- **Scope 3 and logistics:** Elekta tracks product-use emissions per radiotherapy treatment course, works with suppliers on science-based targets, improves logistics data, increases shipping-container utilisation, reduces sea-shipment frequency, and continues shifting freight from air to sea

Future carbon reduction initiatives

In the future we plan to implement further measures such as:

- **Buildings and energy:** Solar panels are scheduled for the main R&D building in 2026/27.

Declaration and sign off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
