Stereotactic Lung Radiotherapy

A collaborative analysis of stereotactic lung radiotherapy outcomes for early-stage non–small-cell lung cancer using daily online cone-beam computed tomography image-guided radiotherapy.

DOI: 10.1097/JTO.0b013e318260e00d

Is there a lower limit of pretreatment pulmonary function for safe and effective stereotactic body radiotherapy for early-stage non–small cell lung cancer?

DOI: 10.1097/JTO.0b013e31824165d7

Lack of a dose-effect relationship for pulmonary function changes after stereotactic body radiation therapy for early-stage non–small cell lung cancer.

DOI: 10.1016/j.ijrobp.2012.09.016

Improved modeling of radiation pneumonitis risk in lung SBRT by incorporating a local dose-effect relation for perfusion reduction.

DOI: http://dx.doi.org/10.1016/j.ijrobp.2013.06.113

Required target margins for image-guided lung SBT: Assessment of target position intrafraction and correction residuals.

DOI: 10.1016/j.prro.2012.03.004

Dose-response relationship with clinical outcome for lung stereotactic body radiotherapy (SBRT) delivered via online image guidance.

Predictors and patterns of regional recurrence following lung SBRT: a report from the Elekta lung research group.

DOI: 10.1016/j.cllc.2016.10.006

Validation of high-risk computed tomography features for detection of local recurrence after stereotactic body radiation therapy for early-stage non–small cell lung cancer.

Peulen H, Mantel F, Guckenberger M, Belderbos J, Werner-Wasik M, Ye H, Grills IS.
DOI: 10.1016/j.ijrobp.2016.04.003

Prediction of early death in patients with early-stage NSCLC-Can we select patients without a potential benefit of SBRT as a curative treatment approach?

DOI: 10.1097/JTO.0b013e31824165d7

Stereotactic body radiotherapy in octo-and nonagenarians for the treatment of early stage lung cancer.

DOI: 10.1016/j.ijrobp.2017.01.019.
Spine Radiosurgery

Clinical practice of image-guided spine radiosurgery – results from an international research consortium.
DOI: 10.1186/1748-717X-6-172

Radiosurgery for benign tumors of the spine using the Synergy S with cone-beam computed tomography image guidance.
Gerszten PC, Chen S, Quader M, Xu Y, Novotny J Jr, Flickinger JC.
DOI: 10.3171/2012.8.GKS12981

A multi-national report on methods for institutional credentialing for spine radiosurgery.
Radiat Oncol. 2013;8:158.
DOI: 10.1186/1748-717X-8-158

Safety and efficacy of stereotactic body radiotherapy as primary treatment for vertebral metastases: a multi-institutional analysis.
DOI: 10.1186/s13014-014-0226-2

Re-irradiation stereotactic body radiotherapy for spinal metastases: a multi-institutional outcome analysis.
DOI: 10.3171/2016.4.SPINE151523

Variability in spine radiosurgery treatment planning – results of an international multi-institutional study.
Radiat Oncol. 2016;1157.
DOI: 10.1186/s13014-016-0631-9

Vertebral compression fractures after stereotactic body radiation therapy: a large, multi-institutional, multinational evaluation.
DOI: 10.3171/2015.10.SPINE141523

Oligometastatic Cancer

A multinational report of technical factors on stereotactic body radiotherapy for oligometastases.
Future Oncol. 2017;13(12).
DOI: 10.2217/fon-2016-0479
For almost five decades, Elekta has been a leader in precision radiation medicine.

Our nearly 4,000 employees worldwide are committed to ensuring everyone in the world with cancer has access to—and benefits from—more precise, personalized radiotherapy treatments.

Elekta makes the following disclosure statement associated with these publications.

The clinical indications referenced in these publications may contain indications for use that may not be included in Elekta device clearances.

There are no significant risks or safety concerns associated with the unapproved use of the medical device discussed in these publications that are known to Elekta that are not discussed in the publications. The information does not promote or exclude any particular treatment approach to the management of a medical condition. Any such approach should be determined by a qualified medical practitioner.

The publications selected in this Bibliography are based on the experience and application by medical experts and is intended as an illustration of an innovative use of Elekta solutions. This information is provided by Elekta Medical Affairs for educational and scientific purposes and not intended for promotional or advertisement of the medical device.
