Where learning, collaboration and innovation unite to advance cancer care.
Imagine a world-class learning experience, delivering expert instruction in a real-time environment. Welcome to Elekta’s Learning and Innovation Center (LINC), the ultimate educational resource to enhance oncology and neuroscience treatment. Today’s increasingly complex technology demands sophisticated training for its safe and optimal use. Dedicated to building competency among healthcare professionals, employees and the cancer care community, Elekta has opened two revolutionary teaching centers in Atlanta, GA, and Beijing, China.

The LINC’s dynamic, state-of-the-art facilities stage Elekta’s entire flagship solutions and introduce a progressive curriculum taught by certified staff. Fully functional systems are matched with adult learning techniques and advanced technology – all to enrich the training process. The venture demonstrates Elekta’s unwavering goals to educate and provide added value to its customers. The LINC promotes continuous improvement in executing Elekta’s equipment and software, so users maximize their investment and refine patient care.

The visionary center also acts as a “link” between customers and Elekta employees by leveraging their expertise to encourage innovative collaboration and sharing of best practices.

Elekta’s Education Destination
Located at the company’s North America headquarters, the LINC Atlanta is a sophisticated, 25,000 sq. ft. facility, fully equipped with working examples of Elekta’s cancer management products to simulate an actual clinical setting. Fashioned to be inspiring and stimulating, the LINC features spacious classrooms, filled with natural light and expansive views of the company’s lush grounds.

The LINC Atlanta incorporates Elekta’s extensive portfolio, enabling comprehensive, hands-on training on:

- Versa HD™ linear accelerator**
- Leksell Gamma Knife® Perfexion™**
- MOSAIQ® Oncology Information System**
- Monaco® and XiO® treatment planning**
- Flexitron® brachytherapy afterloader**
- Esteya® electronic brachytherapy system**
- Clarity® soft tissue visualization system**
- A spectrum of enabling technologies and accessories

Participants enjoy a vibrant, engaging learning environment that encourages substantive training to foster assimilation and knowledge retention. Elekta has teamed with key opinion leaders to develop a cutting-edge curriculum, taught by highly qualified instructors. The program is crafted to ensure a more successful transition from training to real-life application. And, interactive technology in the LINC’s lobby gives visitors the opportunity to explore and learn more about Elekta in a fun and compelling way.

**Not available in all markets. Pending Health Canada clearance.
Superior Curriculum

Elevating education to a new level, Elekta has partnered with leading experts to design curriculum, covering the areas of oncology, software, brachytherapy, neuroscience and imaging.

Blending adult learning approaches with tangible instruction, the program provides a robust practicality that empowers participants to immediately apply their knowledge to their professional practice. Coursework emphasizes clinical workflow by integrating hardware and software solutions for a more relevant and realistic application. During software training, Elekta applications are delivered through a modern and virtualized infrastructure using thin client solutions, which offer students immediate access to any course content.

The goal is to facilitate improved performance as a result of in-depth learning. Attracting physicians, physicists, dosimetrists, therapists, administrators and others involved in care delivery, the LINC presents a complete range of classes. View the course lineup at www.elekta.com/training.

Start an Education Conversation

Championing continuous education, Elekta is committed to ongoing curriculum development with industry experts to sustain its pioneering program. By cultivating an ideal environment for learning, the LINC builds clinical acumen to help providers improve patient care.
