Elevate your cancer registry informatics

METRIQ®

Elevate your cancer registry informatics
Elevate your cancer registry informatics

From effortless case finding and streamlined abstracting to lifetime patient follow-up and powerful data analytics, METRIQ® cancer registry informatics provides the innovations you need to take your cancer registry processes to the next level.
Simplify your entire cancer registry process

METRIQ cancer registry informatics provides smooth workflow management, customizable data integration and powerful outcome analysis tools. Ensuring accurate, streamlined abstracting, it enables you to meet your local and international regulatory requirements\(^*\) while allowing you to make the most of your data.

Easy data importing
Easily integrate incoming records from MOSAIQ® OIS or other hospital information systems and electronic health records.

Simplified patient follow-up
A flexible and customizable follow-up manager incorporates letters, status updates, history, labels, actions, schedules, and control lists.

Performance monitoring
Optional MOSAIQ Oncology Analytics (MOA) dashboards, designed specifically for METRIQ, allow easy performance monitoring against defined cancer measure objectives.

Advanced data security
Elekta Axis Cloud hosting, powered by Microsoft Azure, enables you to reduce your costs, protect your data and work remotely.

\(^*\)METRIQ meets current regulatory and reporting requirements, including: ACoS, AJCC, NAACCR, NPCR and SEER (national and state/provincial), ICD-O-3 and ICD-10.
Efficient, streamlined workflows

Site-specific Workflow Management
Streamline and configure your cancer registry workflow according to your specific data management requirements.

Ease of Use
Speed up the abstracting process with simple navigation, intuitive screen displays and helpful keyboard shortcuts.

Efficient Processes
Expeditied case finding, sophisticated review and acceptance tools, efficient merge capabilities, effective patient follow-up and electronic updates save time and ensure accurate and complete data.

Multi-facility and Multi-state
Share treatment and follow-up information easily without duplicating efforts.

Simplified Data Analysis
Predefined reports use advanced filter options to simplify comprehensive data reporting and analysis.

Enhanced Performance Monitoring
Integration with MOA gives you immediate access to your performance data and provides actionable insights to help you meet your clinical goals.
Inspiring confidence

Standards Compliance
Routine updates ensure METRIQ satisfies current regulatory reporting and accreditation requirements.

High Quality Data
Multiple quality checks help guarantee data records meet applicable regional, national, and international quality standards.

Required Reporting
Simple tools facilitate case reporting for state, provincial, national, and international required submissions.

Mortality Matching
DeathMatch® and SSDI tools provide convenient access to comprehensive patient survival information, matching patients against current national mortality data.

Why METRIQ Cancer Registry Informatics?
- Remote abstracting
- Efficient workflow management
- High-quality data validation
- Valuable quality performance insights with MOA
Advanced Data Integration

- METRIQ imports data, including patient treatment episodes, directly from MOSAIQ® or other top EHR sources through open source importing file configuration.
- The import manager helps determine if incoming records require a new abstract or updates existing patient information.
- Data is immediately available in MOA dashboards to provide valuable performance insights.

Efficient and Dedicated Service and Support

We’re here to help you! Our support specialists, including Certified Tumor Registrars and IT experts, are available to answer questions and solve problems quickly and completely. Team members are active in the industry, such as serving on national standard-setting committees, and multiple channels are available for you to receive support and access resources.

Elekta Axis Cloud

Powered by Microsoft Azure, Elekta Axis frees you to focus completely on your cancer registry workflows—assuring timely processes and peace of mind.

Worry-free
Designed specifically for Elekta oncology software, Elekta Axis helps you improve the performance and scalability of your practice.

Cost-effective
Providing a fully managed service, Elekta Axis allows you to control costs and eliminate unplanned expenses.

Reliable
Leverage the power of Elekta Axis to boost your software performance and eliminate downtime.

Secure
Built and automated on Microsoft Azure, Elekta Axis benefits from built-in system compliance, advanced data security features and multilayer threat protection.
As a leader in precision radiation therapy, Elekta is committed to ensuring every patient has access to the best cancer care possible. We openly collaborate with customers to advance sustainable, outcome-driven and cost-efficient solutions to meet evolving patient needs, improve lives and bring hope to everyone dealing with cancer. To us, it’s personal, and our global team of 4,700 employees combine passion, science, and imagination to profoundly change cancer care.

We don’t just build technology, we build hope.
