

Elekta Care 360

Clinical experts **by your side**

The Elekta Care 360 services described in this document are for United States of America customers only.

Elekta Care 360

From clinical implementation to patient readiness **and beyond**

Elekta Care 360 brings a range of clinical services—developed and delivered by our expert partners—designed to enhance your clinic’s operations and help you benefit from the full potential of your investment throughout the lifetime of your Elekta technology.

Treat your first patient, sooner

By providing the support and guidance you need, enhanced start-up and optimized project timelines, our team of experts are committed to accelerating the time to your first patient treatment.

Experience exceptional expertise

Our team of global experts ensure you get a configuration personalized to meet your needs. Clinical experts act as an extension of your own team, and you can trust our dedicated partners to deliver the highest level of support—while you focus on delivering exceptional patient care.

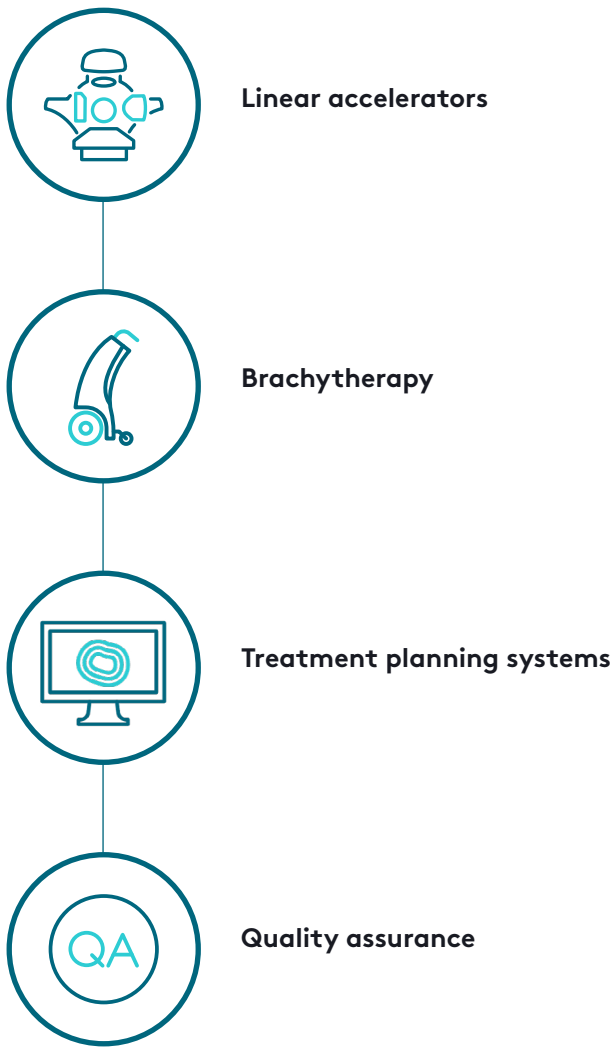

Streamline your implementation

Harness the full capabilities of your Elekta technology and maximize your system’s performance from day one.

From start-up, to treatment planning, and quality assurance, our clinical experts are by your side to enable a seamless implementation.

“Commissioning a new machine can be very time-consuming, so **whatever we can do to reduce that time is very important.** When you have a machine that’s out of commission and you can’t treat patients, you’re affecting the patients care and you’re also affecting your revenue.”

Christine Bloom,
Director of Radiation Oncology at Fox Chase Cancer Center

Streamline your implementation

Linear accelerators

Clinical implementation with a seamless **go-live** to maximize the full potential of your system from day one.

Key benefits:

-  Faster return on investment, starting treatments in the shortest possible time frame.
-  Reduced commissioning and start-up time.
-  Confidence in Elekta beam standard.
-  Prevents referral volume loss from the length of downtime.
-  Eliminates potential error in modeling from incorrect data collection resulting in re-modeling.

Standard Timeline:

Enhanced Go Live:

Streamline your implementation

Brachytherapy

Optimizing and integrating your new brachytherapy solution into clinical operation.

Key benefits:

-  Reduced commissioning and start-up time.
-  Maximize the full potential of your system from start-up.
-  Support for the first patient treatment with certified medical physicists by your side.
-  Faster return on investment, starting treatments in the shortest possible time frame.

Streamline your implementation

Treatment planning systems

A smooth, efficient start, or transition to, Elekta ONE™ planning powered by Monaco® with minimal operational impact, ensuring you can treat your first patient sooner.

A comprehensive transition program with ongoing onsite support

On-site treatment planning experts, carry out all tasks to get you started—helping you build the confidence needed to safely perform advanced treatment plans and procedures.

Validation and TPS commissioning

Side-by-side support

Skills ramp-up

Full adoption

Streamline your implementation

Quality assurance

Building from the ground up or revamping your Radiotherapy Quality Assurance (QA) program.

Key benefits:

Efficient implementation of a quality assurance program with appropriate software and hardware tools.

Reduced burden on local clinical teams when establishing a quality assurance program.

Full confidence in regulatory compliance.

Enhance your QA processes with certified medical physicists by your side to successfully define and deploy efficient QA tools, and practice.

Take advantage of automation features to help significantly reduce the time and effort required to perform patient QA and machine QA.

Experience exceptional expertise

Together, with our partners, we continue to expand our portfolio of clinical services and experts

We use our precision radiation expertise to work hand in hand with clinicians and our partners to continuously develop innovative, outcome-driven and cost-efficient solutions that provide lasting clinical difference. We believe in taking an open and proactive approach, enabling us to build strong partnerships and meet evolving patient needs, no matter where they are in the world.

Experience exceptional expertise

Enhance your operations

Our team of best-in-class experts ensure you get customized services to meet your needs. Clinical experts act as an extension of your own team, and you can trust our team to deliver the highest level of support—while you focus on delivering exceptional patient care.

Remote or onsite Dosimetry Locum Services to support your day-to-day operations and optimize the use of your Elekta solutions.

Remote or onsite Physics Locum Services to help you improve efficiency and outcomes through best practice in treatment planning and medical physics.

Navigate the policy landscape

Leveraging our health policy and government relations expertise, our guidance equips you to effectively navigate the landscape, engage decision makers, and drive policy success.

Annual call with HPGA Reimbursement Analyst.

On-demand self-paced learning opportunities.
