

Maximize clinical resources and minimize disruptions

Partnering with Elekta Care 360

Elekta Care 360* is a suite of clinical and professional services developed and delivered by best-in-class physics and dosimetry experts for linacs, brachytherapy, treatment planning, and quality assurance.

- Serves as an extension of your clinic to enhance operations
- Expedites the time to first-patient treatment
- Accelerates your return on investment

Customized solutions to improve clinical efficacy and outcomes for you, your practice, and your patients.

Clinical experts by your side

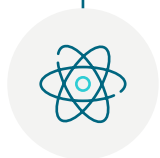

Elekta's best-in-class partners bring over 15 years of experience in providing practical clinical physics and dosimetry services across treatment devices and planning solutions, commissioning hundreds of linacs and treatment planning systems

Elekta Care 360 Dosimetry and Remote Planning Services

A product- and technology-agnostic partnership with clinical experts by your side to optimize your clinical resources and complement your existing workforce, so you avoid disruption in patient care.

- Efficient and effective coverage in times of increased volumes, vacations, illnesses or other staffing decisions
- Treatment planning and system expertise
- Flexible short-term and long-term coverage options, per plan or fixed pricing to meet your needs

Elekta Care 360 Physics Services

Improved efficiency and outcomes through best practice in treatment planning and medical physics.

- Expedited linac acceptance and commissioning
- Streamlined clinical implementation process, with certified medical physicists by your side to successfully commission your new brachytherapy or linac system into clinical use
- Successfully define and deploy efficient QA program implementation with Machine and Patient QA software setup

Elekta Care 360 enhanced Go-live

Clinical implementation with a seamless, swift and successful go-live process with experienced medical physicists by your side from on-site implementation, accelerated seven-day linac acceptance/ commissioning process, Treatment Planning System and Quality Assurance validation, SRS/SBRT machine acceptance/commissioning, to patient readiness, and beyond.

Enhance efficiency, elevate care with Elekta Care 360

Are you facing challenges in optimizing your clinic's resources while maintaining high-quality patient care? Elekta Care 360 offers a suite of solutions tailored to your needs.

Consider the following questions to determine if Elekta Care 360 may be right for your clinic:

- **Coverage and workload:** Do you struggle with coverage during peak times, after-hours, vacations, or illnesses?
- **Work-life balance:** Is maintaining work life balance a concern for your staff?
- **Treatment Planning:** Have you encountered difficulties in creating high-quality treatment plans due to staffing constraints or increasing patient volume?
- **Clinic growth:** Are you projecting growth in your clinic's patient volume?

Learn more about how Elekta Care 360 can improve your clinic's operations

Scalability and cost-effectiveness

Elekta Care 360 services are designed to scale with your needs, providing you the flexibility to adapt to changing patient volumes and treatment complexities. Supplementing your clinic staff in dosimetry, medical physics and treatment planning services can help you reduce overhead costs associated with staffing and training, allowing you to allocate resources more efficiently, and provide work-life balance for your staff.

Flexibility and convenience

By partnering with Elekta for your dosimetry, physics and treatment planning needs, you can save valuable time and resources while ensuring timely delivery of treatment plans, regardless of your clinic's workload.
